Professional Summary

Mid-Level Full Stack Developer with experience **independently implementing** web features, **REST APIs** and Oracle integrations. Hands-on experience in front-end and back-end development, requirements analysis, problem solving and testing. Develops solutions for an ERP I built, focusing on quality, secure data access and sprint-based delivery.

Technical Skills

Front-end: HTML, CSS, JavaScript, Angular, Bootstrap and responsive interfaces.

Back-end and databases: PHP, **REST APIs**, MySQL, **Oracle SQL** and CRUD operations.

Queries and testing: semantic catalogs, structured query plans, secure SQL compilation and **automated testing**.

Tools and methods: Git, GitHub, Linux, Figma and Agile (Scrum/Sprints).

Professional Experience

Junior Software Developer | VPSYSTEM | Present

- Develop enterprise web features and Oracle integrations, including SQL queries and **REST APIs**.
- Analyze requirements, define workflows, implement and validate features, and organize delivery through sprints.
- Develop AI agent features in an ERP I built, including dynamic queries, a semantic catalog, permissions, scoped access and data retrieval controls.
- Perform **automated testing** and validation against real Oracle data, support deployment and provide technical support to clients.

Administrative Assistant | Via Partes | Feb 2023 – Nov 2024

- Supported administrative operations, organized internal processes and tracked multiple projects, strengthening analytical, communication and attention-to-detail skills.

Projects

AI agent integrated with an ERP I built

- **In production:** chat with natural-language queries over enterprise data, a dynamic execution engine and conversational context, with access controls and read-only queries.
- **Inventory and Purchasing:** business concepts validated against real data, **not yet enabled in production**. Independent validation passed **33/33** comparisons; the backend test suite passed **906/906** tests.

Technology Management System | Full Stack

Professional project translating Figma designs into HTML/CSS/JavaScript and integrating a PHP back-end with Oracle.

Other Projects

Academic API (PHP/MySQL): CRUD and database integration. Web Services (JavaScript/HTML/CSS): digital menu website. Twitter Clone (PHP 7/MySQL): users, timeline and tweets. Spotify Interface (Bootstrap 4): responsive layouts using grid and flexbox.

Education

Bachelor's Degree in Computer Engineering | In progress, 2023–2027

Centro Universitário de Excelência – ENIAC, Guarulhos, São Paulo, Brazil
