Professional Summary

Junior Full Stack Developer with hands-on experience in corporate web applications, Oracle database integration, and REST API development. Experienced working in agile environments with sprint-based delivery, focusing on quality, efficiency, and continuous improvement. Currently seeking an opportunity as a Junior Developer to grow within a modern technology team.

Core Technologies

JavaScript | PHP | MySQL | Oracle SQL | Angular | REST APIs | Git | Linux

Professional Experience

Junior Software Developer – VPSYSTEM (Current)

- Participated in the development of a corporate web-based technology management system.
- Built and integrated functionalities with Oracle Database, including SQL queries and data structuring.
- Supported requirements gathering, user flow definition, and feature validation.
- Worked in Agile methodologies, organizing tasks by sprints and monitoring deliveries.
- Provided technical support to clients, assisting in troubleshooting and system improvements.

Administrative Assistant – Via Partes (Feb 2023 – Nov 2024)

- Supported internal administrative processes and organization of multiple projects.
- Developed analytical, communication, and detail-oriented skills now applied in software development.

Projects

API Project (PHP + MySQL)

- Academic project using CRUD operations and database integration.

Web Services Project (JavaScript, HTML, CSS)

- Developed a digital menu website for a newly opened restaurant.

Twitter Clone (PHP 7 + MySQL)

- Created a social timeline application with user registration and posting features.

Spotify Interface (Bootstrap 4)

- Built responsive UI layouts applying grid and flexbox concepts.

Corporate Technology Management System (Full Stack)

- Professional project involving Figma layout integration into HTML/CSS/JS front-end.
- Connected back-end in PHP with Oracle database ensuring visual fidelity and functional consistency.
